DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 41-45, 47-54, 56, 57 and 58 are rejected under 35 U.S.C. 102(b) as being anticipated by over **Iddan et al (Patent 5604531)**.

3. Re Claims 41, 50, 51, 53 and 54: **Iddan et al** teach an in vivo system for receiving in vivo signals, the system comprising: a receiver; a plurality of antennas (**See Col. 4, lines 32-40**); connected to the receiver (**46**), wherein the plurality of antennas are to receive an in vivo signal; and a recorder (**19**), wherein the recorder is separated from the receiver and connected to the receiver by at least one cable and the cable connected to the receiver and the recorder, wherein the cable is capable of transferring energy to the receiver, radio frequency signals to the recorder, and control signals(**See Figures 1- 6**).

4. Re Claims 42-45, 52, 55 and 58: **Iddan et al** teach an in vivo system wherein the receiver comprises a selection unit (**14**) and an amplifier (32) and the selection unit is to select a signal received by one of the plurality of antennas (**See Col. 5, lines 19-25**).

5. Re Claims 47 and 48: **Iddan et al** teach an in vivo system wherein the switching unit (**48**) is to transfer to the recorder at least one signal received from at least one antenna out of the plurality of antennas (**See Col. 4, lines 41-54**).

6. Re Claims 49 and 57: **Iddan et al** teach an in vivo system wherein the plurality of antennas comprises a radio frequency antenna (**See Col. 3, lines 58-67**).

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claims 46 and 55 are rejected under 35 U.S.C. 103(a) as being unpatentable over **Iddan et al** in view of **Kimchy et al** (Pub. 2003/0139661).

9. Re Claims 46,55 and 56: **Iddan et al** teach the claimed invention, see rejection supra; however **Iddan et al** does not expressly disclose the system includes a pre-amplifier.

10. **Kimchy et al** teach an in vivo system wherein a preamplifier is incorporated the in vivo system. (**See Paragraphs [0029], and also [0084]** for plurality of antennae).

It would have been obvious to one having ordinary skill in the art at the time invention was made to modify the in vivo system similar to that of **Kimchy et al** to include pre-amplifier similar to that of **Kimchy et al** in order to amplify signal (low level signal possible at high impedance) to line level.
